Microsoft Dynamics 365

AIM Assessment for Microsoft Business Applications

Chart your path to the cloud

Take the first step in modernizing your on-premises Dynamics CRM solution by gaining a thorough understanding of what moving to Dynamics 365 could mean for your organization, employees, and customers.

Execute your vision with our experts

You're not alone on your modernization journey. Technology partners are an important extension of Microsoft, offering implementation and industry expertise to every deployment. Transforming your business takes planning, however. Together with our qualified migration experts, the Advanced AIM Assessments can help you build a plan tailored to your needs and realize the cloud's full potential.

Get to know Advantage

With extensive solution development experience, Advantage can help you improve your workforce productivity by leveraging Microsoft Dynamics 365 and the Microsoft Power Platform. We will work with you to understand your environment and identify where the opportunities are to achieve continuous business value from your Microsoft investments.

What will we learn?
Drive deep understanding of the benefit and impact that cloud migration could have on your organization.

Who should attend?
Invite key stakeholders and decision makers from across your business to participate.

What happens after?
Envision your future state, review assessment findings, and receive next step recommendations.

Drive change, start today

Create business resiliency and unlock key use cases by integrating your data, your processes, and your teams with Dynamics 365 and the Power Platform. Let's talk about how you'll get there.

Schedule your AIM Assessment with us today!
