

Everything you need to know about **Dynamics 365** and **Microsoft Power Apps**

The Microsoft Power Platform consists of 5 components

Microsoft Power BI

A business analytics service that provides interactive visualizations and business intelligence capabilities.

Microsoft PowerApps

A low-code development platform that allows users to build custom business apps and automate workflows without extensive coding knowledge.

Microsoft Power Pages

Allows you to easily build websites that can help to provide information and services to customers.

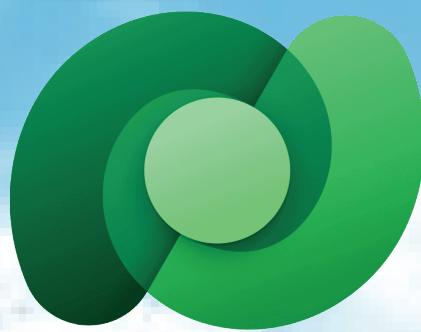

Microsoft Power Automate

A cloud-based service that allows users to create automated workflows and streamline repetitive tasks across multiple applications.

Microsoft Power Virtual Agents

A no-code chatbot builder that allows users to create intelligent virtual agents to automate customer support and other conversational scenarios.

The Dataverse

Allows all the data used by the above to be secured in the Cloud.

Did you know that Dynamics 365 & Microsoft Power Apps are model-driven applications?

Microsoft PowerApps

Model Driven Apps

- ✓ Create a CRM the way you want from the ground up.
- ✓ Perfect for businesses that want something completely bespoke not offered by Dynamics 365.

Canvas App

- ✓ Drag and drop your way to a new application for your business.
- ✓ Perfect for specific tasks that you need it to perform.

Microsoft Dynamics[®] 365

Model Driven Apps

- ✓ Comes 'out-of-the-box' with pre-defined features for your business to get started.
- ✓ The full suite of products can service any department such as marketing, sales, field service, customer service, projects & many more.
